

9 Pass Value Range Raft For The Production Of T - Section For Floor Decking

During recent times engineering manufacture has seen a decline. As a result budgets for new equipment are ever tighter. Formit has responded to this by producing a value rollformer. Though this is a value rollformer it is still of a robust construction and manufactured to the same high standards. The cost is reduced by a simplified design.

Coil - Galvanised Mild Steel 1.2mm

F1(Ø60) 9 PASS VALUE ROLLFORMING RAFT
Spare pass special purpose Rollforming raft with substantial stands & 60mm diameter shafts.

Easily adjusted rolling pressure via gauged screw assembly at each forming station.

An adjustable entry guide assembly with digital readout is available to be mounted prior to the rollforming head section.
