

Worldwide Machinery Removal & Re-Installation Service

WORLDWIDE MACHINERY REMOVAL & RE-INSTALLATION SERVICE

Formit Limited, specialists in Rollforming & coil processing equipment have introduced a new service to it's already vast involvement in the industry. With many plants & associated machinery being re-located, Formit have launched a removal & re-installation service.

Formit team of skilled engineers will Project manage the removal, transportation & re-installation of small or large production lines. Expertise in coil processing, rollforming & electrical controls make Formit the ideal choice for the removal and re-location of all equipment.

If the production line has been purchased at auction it is likely that the equipment may need re-tooling. This can be managed, supplied and fitted as required. This will provide a seamless transition when the equipment is relocated as it will hit the ground running. All Formit Tooling is designed using COPRA software to ensure the tooling is right first time.

Other services also offered for customers is a refurbishment service. All work undertaken as part of a refurbishment is engineered to new standard & is fully guaranteed. Equipment can also be upgraded depending on requirements.

Formit have already successfully moved production lines to Europe, South America and several other countries Worldwide.

Formit will move ANY manufacturers equipment ANYWHERE in the WORLD.

No task is too BIG or small for Formit.

Call the sales office TODAY to discuss your requirements and let Formit take the Headache out of the re-location of your equipment.
