

## Special Purpose Feeder / Former For the Production of Joist Nail Plates

### FORMIT SPECIAL PURPOSE FEEDER / FORMER

As well as being leaders in the rollforming market, Formit also offer special purpose machines.

This machine is a specially designed Power Press Feeder / Former, It was designed such that it can be used as a standard press feed, or that the forming section of the machine could be engaged and a safe edge could be rolled onto the material as it was being fed into the Power Press.

### ELECTRICAL CONTROLS

The control system accepts programs that can be recalled by the operator as required and stored for later use. Controls for the machine are housed in appropriate panel enclosures at the rear of the line, with the main control desk situated at the front of the line.

Wiring between machines and enclosures will be via in-floor trunking.
